

Save Our Suburban General Hospital

www.SaveOurSGH.org

Help Save our Suburban General Hospital from the threat of closure by the West Penn Allegheny Health System/AGH. They have damaged it enough. An outpatient surgi-center or MedExpress is not a hospital.

The hospital is now considered for closure by WPAHS (West Penn Allegheny Health System) and AGH. As many saw in recent newspaper articles "they" are considering diminishing it to an outpatient facility. We need to challenge this. Our community, many jobs, and the rightful desires of the sick in our community to be cared for by their doctors and nurses and allied professionals at SGH are threatened.

Our advocacy by any means is now critical. The disregard for our community needs by the West Penn Allegheny Health System should not go without a response. After recent similar events with South Side Hospital and Braddock we should not trust that inaction and hope are adequate- WE MUST ACT NOW!

If you are not part of the solution, you're part of the problem!
